(54) TAIL ROTOR-LESS HELICOPTER TOY

(57)Abstract:

PURPOSE: To exert no influence on air performance even if a tail rotor is removed, to reduce the cost of a product by decreasing the number of channels of radio, and to simplify the operation so as to enable a beginner to play a helicopter toy.

CONSTITUTION: A tail rotor-less helicopter toy is so constructed that a tail unit 5 for generating lift in the direction of cancelling the negative torque generated in an airframe by the rotation of a main rotor during flying is fitted to the rear end of the airframe 1.

LEGAL STATUS

[Date of request for examination] 04.10.1994

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of application converted rejection or application converted registration]

[Date of final disposal for application] 17.12.1996
